NOTE TO THE READER	9
LIST OF PARTICIPANTS	11
PREAMBLE	17
Background	17
Objective and Scope	17
Selection of Topics for Monographs	18
Data for Monographs	19
The Working Group	19
Working Procedures	19
Exposure Data	20
Studies of Cancer in Humans	21
Studies of Cancer in Experimental Animals	25
Other Data Relevant to an Evaluation of Carcinogenicity and Its Mechanisms ..	27
Summary of Data Reported	29
Evaluation	30
References	34
GENERAL REMARKS	39
THE MONOGRAPHS	
Infection with schistosomes (<i>Schistosoma haematobium</i> , <i>S. mansoni</i> and <i>S. japonicum</i>) .	45
1. Exposure data	45
1.1 Structure and biology of schistosomes	45
1.1.1 Taxonomy	45
1.1.2 Structure	45
1.1.3 Life cycle and biology of the adult worm	46
1.2 Methods for detection of infection	48
1.2.1 History taking	48
1.2.2 Clinical diagnosis	48
1.2.3 Parasitological tests	49
1.2.4 Immunological tests	49
1.2.5 Establishment of absence of infection	50

CONTENTS

1.3	Epidemiology of infection	50
1.3.1	Geographical distribution	50
1.3.2	Risk factors for infection	55
1.3.3	Aggregation of infection	55
1.3.4	Prevalence and intensity of infection	55
1.3.5	Sex-related patterns of infection	58
1.3.6	Relationship of morbidity to intensity of infection	58
1.3.7	Relationship of morbidity to mortality from infection	58
1.4	Clinical disease in humans (other than cancer)	59
1.5	Treatment and control	61
1.5.1	Treatment	61
1.5.2	Control	62
2.	Studies of cancer in humans	63
2.1	Descriptive studies	63
2.1.1	<i>Schistosoma haematobium</i>	63
2.1.2	<i>Schistosoma mansoni</i>	66
2.1.3	<i>Schistosoma japonicum</i>	67
2.2	Case reports and case series	70
2.2.1	<i>Schistosoma haematobium</i>	71
2.2.2	<i>Schistosoma mansoni</i>	72
2.2.3	<i>Schistosoma japonicum</i>	73
2.3	Cohort study	73
2.4	Case-control studies (with retrospective exposure assessment)	74
2.4.1	<i>Schistosoma haematobium</i>	74
2.4.2	<i>Schistosoma japonicum</i>	77
3.	Studies of cancer in animals	81
3.1	Infection with <i>Schistosoma haematobium</i> alone	81
3.1.1	Mouse	81
3.1.2	Rat	81
3.1.3	Hamster	82
3.1.4	Opossum	82
3.1.5	Nonhuman primate	82
3.2	Infection with <i>Schistosoma haematobium</i> in combination with administration of known carcinogens	83
3.2.1	2-Acetylaminofluorene	83
3.2.2	<i>ortho</i> -Aminoazotoluene	84
3.2.3	<i>N</i> -Nitrosamines	84
3.3	Infection with <i>Schistosoma mansoni</i> alone	84
3.3.1	Mouse	84
3.3.2	<i>Mastomys natalensis</i>	85
3.3.3	Hamster	85
3.3.4	Nonhuman primate	85

CONTENTS

3.4 Infection with <i>Schistosoma mansoni</i> in combination with administration of known carcinogens	86
3.4.1 2-Amino-5-azotoluene	86
3.4.2 2-Naphthylamine and 2-acetylaminofluorene	86
3.5 Infection with <i>Schistosoma mansoni</i> in combination with administration of compounds used or evaluated in the past as antischistosomal agents ..	87
3.6 Infection with <i>Schistosoma japonicum</i> alone	87
3.7 Infection with <i>Schistosoma japonicum</i> in combination with administration of known carcinogens	87
3.7.1 Dimethylaminobenzene	87
3.7.2 2-Acetylaminofluorene	88
4. Other data relevant for evaluation of carcinogenicity and its mechanisms	88
4.1 Pathology of infection	88
4.1.1 Humans	88
4.1.2 Experimental systems	92
4.2 Other observations relevant to the interpretation of carcinogenicity and mechanisms of carcinogenesis	93
4.2.1 Humans	93
4.2.2 Experimental systems	95
5. Summary of data reported and evaluation	96
5.1 Exposure data	96
5.2 Human carcinogenicity data	97
5.3 Animal carcinogenicity data	99
5.4 Other relevant data	99
5.5 Evaluation	99
6. References	100
Infection with liver flukes (<i>Opisthorchis viverrini</i>, <i>O. felineus</i> and <i>Clonorchis sinensis</i>) .	121
1. Exposure data	121
1.1 Structure and biology of liver flukes	121
1.1.1 Taxonomy	121
1.1.2 Structure	121
1.1.3 Life cycle and biology of the adult worm	122
1.1.4 Immune response to infection	124
1.2 Methods for detection of infection	124
1.2.1 Qualitative faecal examination for eggs	124
1.2.2 Quantitative faecal assessment of intensity of infection	125
1.2.3 Serological tests for helminth-specific antibody and antigen	125
1.2.4 Intradermal tests	126
1.3 Epidemiology of infection	126
1.3.1 Geographical distribution	126
1.3.2 Risk factors for infection	130

CONTENTS

1.3.3 Age- and sex-related patterns of infection	132
1.3.4 Aggregation of infection	132
1.4 Clinical disease in humans (other than cancer)	134
1.5 Treatment and control	135
2. Studies of cancer in humans	136
2.1 Descriptive studies	136
2.1.1 <i>Opisthorchis viverrini</i>	136
2.1.2 <i>Opisthorchis felineus</i>	137
2.2 Case reports and case series	137
2.2.1 <i>Opisthorchis viverrini</i>	137
2.2.2 <i>Opisthorchis felineus</i>	137
2.2.3 <i>Clonorchis sinensis</i>	141
2.3 Case-control studies	141
2.3.1 <i>Opisthorchis viverrini</i>	141
2.3.2 <i>Clonorchis sinensis</i>	143
3. Studies of cancer in animals	144
3.1 Infection with <i>Opisthorchis viverrini</i> alone	144
3.2 Infection with <i>Opisthorchis viverrini</i> in combination with administration of known carcinogens	146
3.2.1 <i>N</i> -Nitrosodimethylamine	146
3.2.2 <i>N</i> -Nitrosodiethylamine	148
3.2.3 <i>N</i> -Nitrosodihydroxydi- <i>n</i> -propylamine	148
3.3 Infection with <i>Opisthorchis viverrini</i> in combination with administration of other modifying factors	149
3.4 Infection with <i>Opisthorchis felineus</i>	150
3.5 Infection with <i>Clonorchis sinensis</i> alone	150
3.5.1 Rat	150
3.5.2 Cat	150
3.5.3 Dog	150
3.6 Infection with <i>Clonorchis sinensis</i> in combination with administration of known carcinogens	150
3.6.1 Aflatoxin B ₁	150
3.6.2 <i>N</i> -Nitrosodimethylamine	151
3.6.3 2-Acetylaminofluorene	152
4. Other data relevant for evaluation of carcinogenicity and its mechanisms ..	152
4.1 Pathology of infection	152
4.1.1 Humans	152
4.1.2 Experimental systems	155
4.1.3 Comparison of humans and experimental animals	157
4.2 Other observations relevant to the interpretation of carcinogenicity and mechanisms of carcinogenesis	157
4.2.1 Humans	157

CONTENTS

4.2.2 Experimental systems	158
5. Summary of data reported and evaluation	159
5.1 Exposure data	159
5.2 Human carcinogenicity data	160
5.3 Animal carcinogenicity data	161
5.4 Other relevant data	161
5.5 Evaluation	161
6. References	162
Infection with <i>Helicobacter pylori</i>	177
1. Exposure data	177
1.1 Structure and biology of <i>Helicobacter pylori</i>	177
1.1.1 Taxonomy	177
1.1.2 Biology	177
1.1.3 Agent-host relationship	179
1.2 Methods for detection of infection	181
1.2.1 Methods based on gastric biopsy specimens	181
1.2.2 Methods based on gastric juice samples	182
1.2.3 Methods based on faecal specimens	182
1.2.4 Methods based on dental plaque and saliva samples	182
1.2.5 Methods based on blood samples	183
1.2.6 Urea breath test	183
1.3 Epidemiology of infection	183
1.3.1 Prevalence	183
1.3.2 Risk factors for infection	184
1.3.3 Routes of transmission	186
1.4 Clinical disease in humans (other than cancer)	187
1.4.1 Gastritis	187
1.4.2 Duodenal ulcer disease	187
1.4.3 Gastric ulcer disease	187
1.4.4 Hypertrophic protein-losing gastritis	188
1.4.5 Childhood diseases	188
1.5 Treatment and control	188
1.5.1 Antibiotics and acid suppressive therapy	188
1.5.2 Vaccination	188
2. Studies of cancer in humans	188
2.1 Descriptive studies	188
2.1.1 Geographical correlations	188
2.1.2 Time trends	191
2.1.3 Socioeconomic trends	191
2.2 Case series	191
2.2.1 Gastric carcinoma	191

CONTENTS

2.2.2	Gastric lymphoma	192
2.3	Cohort studies	192
2.3.1	Gastric carcinoma	192
2.3.2	Gastric lymphoma	197
2.4	Case-control studies	197
2.4.1	Gastric carcinoma	197
2.4.2	Other cancers	203
2.5	Intervention studies	203
3.	Studies of cancer in experimental animals	203
3.1	Infection with <i>Helicobacter pylori</i> alone	203
3.2	Infection with <i>Helicobacter pylori</i> in combination with administration of known carcinogens	203
3.3	Infection with other <i>Helicobacter</i> species	205
3.4	Infection with other <i>Helicobacter</i> species in combination with administration of known carcinogens	205
4.	Other data relevant for evaluation of carcinogenicity and its mechanisms ..	206
4.1	Pathology of infection	206
4.1.1	Humans	206
4.1.2	Experimental systems	211
4.2	Other observations relevant to the interpretation of carcinogenicity and mechanisms of carcinogenesis	213
4.2.1	Humans	213
4.2.2	Experimental systems	217
5.	Summary of data reported and evaluation	218
5.1	Exposure data	218
5.2	Human carcinogenicity data	218
5.3	Animal carcinogenicity data	219
5.4	Other relevant data	219
5.5	Evaluation	220
6.	References	220
	SUMMARY OF FINAL EVALUATIONS	241
	CUMULATIVE INDEX TO THE <i>MONOGRAPHS</i> SERIES	243

NOTE TO THE READER

The term 'carcinogenic risk' in the *IARC Monographs* series is taken to mean the probability that exposure to an agent will lead to cancer in humans.

Inclusion of an agent in the *Monographs* does not imply that it is a carcinogen, only that the published data have been examined. Equally, the fact that an agent has not yet been evaluated in a monograph does not mean that it is not carcinogenic.

The evaluations of carcinogenic risk are made by international working groups of independent scientists and are qualitative in nature. No recommendation is given for regulation or legislation.

Anyone who is aware of published data that may alter the evaluation of the carcinogenic risk of an agent to humans is encouraged to make this information available to the Unit of Carcinogen Identification and Evaluation, International Agency for Research on Cancer, 150 cours Albert Thomas, 69372 Lyon Cedex 08, France, in order that the agent may be considered for re-evaluation by a future Working Group.

Although every effort is made to prepare the monographs as accurately as possible, mistakes may occur. Readers are requested to communicate any errors to the Unit of Carcinogen Identification and Evaluation, so that corrections can be reported in future volumes.
