THE MONOGRAPHS	
Dry cleaning	33
Some chlorinated solvents and related chemicals	
Trichloroethylene	75
Tetrachloroethylene	
1,2,3-Trichloropropane	
Chloral and chloral hydrate	245
Dichloroacetic acid	271
Trichloroacetic acid	291
1-Chloro-2-methylpropene	315
3-Chloro-2-methylpropene	325
Other industrial chemicals	
Acrolein	337
Crotonaldehyde	
Furan	303
Furfural	
Benzofuran	431

IARC MONOGRAPHS VOLUME 63

Vinyl acetate	443
Vinyl fluoride	
SUMMARY OF FINAL EVALUATIONS	477
APPENDIX 1. SUMMARY TABLES OF GENETIC AND RELATED EFFECT	rs481
APPENDIX 2. ACTIVITY PROFILES FOR GENETIC AND RELATED EFFE	CTS 499
SUPPLEMENTARY CORRIGENDA TO VOLUMES 1–62	521
CUMULATIVE INDEX TO THE MONOGRAPHS SERIES	523

NOTE TO THE READER

The term 'carcinogenic risk' in the *IARC Monographs* series is taken to mean the probability that exposure to an agent will lead to cancer in humans.

Inclusion of an agent in the *Monographs* does not imply that it is a carcinogen, only that the published data have been examined. Equally, the fact that an agent has not yet been evaluated in a monograph does not mean that it is not carcinogenic.

The evaluations of carcinogenic risk are made by international working groups of independent scientists and are qualitative in nature. No recommendation is given for regulation or legislation.

Anyone who is aware of published data that may alter the evaluation of the carcinogenic risk of an agent to humans is encouraged to make this information available to the Unit of Carcinogen Identification and Evaluation, International Agency for Research on Cancer, 150 cours Albert Thomas, 69372 Lyon Cedex 08, France, in order that the agent may be considered for re-evaluation by a future Working Group.

Although every effort is made to prepare the monographs as accurately as possible, mistakes may occur. Readers are requested to communicate any errors to the Unit of Carcinogen Identification and Evaluation, so that corrections can be reported in future volumes.
