GENERAL REMARKS	31
THE MONOGRAPHS	
Silica	41
Some Silicates	243
Palygorskite (Attapulgite)	
Sepiolite	
Wollastonite	
Zeolites other than erionite	
Coal dust	337
para-Aramid fibrils	409
SUMMARY OF FINAL EVALUATIONS	441
APPENDIX 1. TEST SYSTEM CODE WORDS FOR GENETIC AND RELAT	ED
EFFECTS	443

APPENDIX 2. SUMMARY TABLES OF GENETIC AND RELATED EFFECTS	451
APPENDIX 3. ACTIVITY PROFILES FOR GENETIC AND RELATED EFFECTS	461
SUPPLEMENTARY CORRIGENDA TO VOLUMES 1–68	
CUMULATIVE INDEX TO THE MONOGRAPHS SERIES	479

NOTE TO THE READER

The term 'carcinogenic risk' in the *IARC Monographs* series is taken to mean the probability that exposure to an agent will lead to cancer in humans.

Inclusion of an agent in the *Monographs* does not imply that it is a carcinogen, only that the published data have been examined. Equally, the fact that an agent has not yet been evaluated in a monograph does not mean that it is not carcinogenic.

The evaluations of carcinogenic risk are made by international working groups of independent scientists and are qualitative in nature. No recommendation is given for regulation or legislation.

Anyone who is aware of published data that may alter the evaluation of the carcinogenic risk of an agent to humans is encouraged to make this information available to the Unit of Carcinogen Identification and Evaluation, International Agency for Research on Cancer, 150 cours Albert Thomas, 69372 Lyon Cedex 08, France, in order that the agent may be considered for re-evaluation by a future Working Group.

Although every effort is made to prepare the monographs as accurately as possible, mistakes may occur. Readers are requested to communicate any errors to the Unit of Carcinogen Identification and Evaluation, so that corrections can be reported in future volumes.
