

## CONTENTS

NOTE TO THE READER.....	1
LIST OF PARTICIPANTS.....	3
PREAMBLE .....	7
1. Background.....	9
2. Objective and Scope .....	9
3. Selection of Topics for Monographs .....	10
4. Data for Monographs .....	11
5. The Working Group .....	11
6. Working Procedures .....	11
7. Exposure Data.....	12
8. Studies of Cancer in Humans .....	14
9. Studies of Cancer in Experimental Animals.....	17
10. Other Data Relevant to an Evaluation of Carcinogenicity and its Mechanisms .....	20
11. Summary of Data Reported .....	22
12. Evaluation .....	23
13. References.....	28
GENERAL REMARKS.....	33
THE MONOGRAPHS.....	37
<b>Betel-quid and Areca-nut Chewing .....</b>	39
1. Exposure Data.....	41
1.1 Composition of betel quid.....	41
1.1.1 Betel quid .....	41
1.1.2 Areca nut.....	42
1.1.3 Betel leaf.....	50
1.1.4 Betel inflorescence .....	50
1.1.5 Slaked lime .....	50
1.1.6 Catechu .....	51
1.1.7 Tobacco .....	51
1.1.8 Miscellaneous additives and contaminants.....	51
1.2 Areca nut-based industrial packaged products .....	52
1.3 Consumption by geographical region .....	52

1.3.1	India .....	52
(a)	Adults .....	53
(b)	Children and adolescents .....	59
1.3.2	Pakistan .....	61
1.3.3	Bangladesh .....	62
1.3.4	Sri Lanka.....	62
1.3.5	Maldives .....	63
1.3.6	People's Republic of China .....	63
1.3.7	Taiwan, China .....	64
1.3.8	Myanmar .....	68
1.3.9	Thailand .....	68
1.3.10	Lao People's Democratic Republic .....	69
1.3.11	Cambodia .....	69
1.3.12	Malaysia .....	69
1.3.13	Singapore .....	70
1.3.14	Indonesia.....	70
1.3.15	The Philippines .....	71
1.3.16	Papua New Guinea .....	71
1.3.17	Palau .....	72
1.3.18	Guam .....	73
1.3.19	Others .....	73
1.3.20	Migrant populations .....	74
(a)	South Africa .....	74
(b)	United Kingdom.....	75
(c)	Others .....	78
1.3.21	Placement of the quid in the mouth .....	78
1.4	Regulations and legislation .....	78
	Regulation of import and sale of areca-containing products .....	79
(a)	India .....	79
(b)	North America .....	79
(c)	European Union .....	79
(d)	Limited bans in other countries .....	80
2.	Studies of Cancer in Humans .....	80
2.1	Oral cancer .....	80
2.1.1	India, Pakistan and Sri Lanka .....	80
(a)	Descriptive studies and case series .....	80
(b)	Cohort studies .....	86
(c)	Case-control studies .....	87
(d)	Cross-sectional surveys .....	101
(e)	Synergism.....	101
2.1.2	Taiwan, China .....	104
(a)	Descriptive study .....	104

(b) Case-control studies .....	105
2.1.3 South-East Asia.....	108
(a) Malaysia .....	108
(b) Myanmar .....	110
(c) Thailand .....	110
2.1.4 Papua New Guinea .....	111
2.1.5 Migrant populations .....	112
(a) South Africa .....	112
(b) United Kingdom.....	112
2.2 Some betel quid-associated lesions, and precancerous lesions and conditions .....	113
2.2.1 Introduction.....	113
2.2.2 Betel quid-associated oral lesions.....	113
2.2.3 Leukoplakia and erythroplakia .....	113
(a) India .....	114
(b) Taiwan, China .....	116
(c) South-East Asia .....	123
(d) Migrants .....	123
2.2.4 Oral submucous fibrosis .....	123
(a) India and Pakistan .....	123
(b) People's Republic of China .....	127
(c) Taiwan, China .....	128
(d) South-East Asia .....	128
(e) Migrants .....	128
2.2.5 Oral lichen planus.....	129
(a) India .....	129
(b) South-East Asia .....	130
2.2.6 Multiple and mixed lesions.....	130
2.2.7 Malignant transformation .....	131
(a) India and Pakistan .....	131
(b) Taiwan, China .....	132
(c) Migrants .....	132
2.3 Other upper aerodigestive cancer .....	132
2.3.1 India .....	132
2.3.2 Taiwan, China .....	137
2.4 Other cancers.....	137
2.4.1 Stomach cancer .....	137
2.4.2 Lung cancer.....	137
2.4.3 Cervical cancer .....	139
2.4.4 Liver cancer .....	139
(a) Taiwan, China .....	139
(b) Thailand .....	140

3.	Studies of Cancer in Experimental Animals.....	142
3.1	Oral administration .....	142
3.1.1	Mouse .....	142
3.1.2	Rat.....	145
3.1.3	Hamster.....	146
3.2	Skin application.....	147
	Mouse .....	147
3.3	Subcutaneous administration .....	147
3.3.1	Mouse .....	147
3.3.2	Rat.....	148
3.4	Intraperitoneal administration .....	148
	Mouse .....	148
3.5	Administration to the oral mucosa or cheek pouch .....	149
3.5.1	Rat.....	149
3.5.2	Hamster.....	149
3.5.3	Baboon .....	154
3.6	Intravaginal instillation .....	154
	Mouse .....	154
3.7	Administration with known carcinogens or modifiers of cancer risk ..	154
3.7.1	Mouse .....	154
3.7.2	Rat .....	156
3.7.3	Hamster.....	156
4.	Other Data Relevant to an Evaluation of Carcinogenicity and its Mechanisms .....	160
4.1	Absorption, distribution, metabolism and excretion.....	160
4.1.1	Humans .....	160
	(a) Constituents of betel quid .....	160
	(b) Biomarkers of constituents of betel quid.....	162
4.1.2	Experimental systems .....	166
	(a) Areca nut/arecoline .....	166
	(b) Betel leaf/hydroxychavicol/eugenol .....	168
	(c) Formation of nitrosamines .....	169
	(d) Formation of reactive oxygen species from betel-quid ingredients .....	170
	(e) Antioxidant effects.....	172
4.2	Physiological and toxic effects .....	173
4.2.1	Humans .....	173
	(a) Psychopharmacological effects .....	173
	(b) Effects on oral hard and soft tissues .....	173
	(c) Effects on various physiological systems .....	175
	(d) Other effects.....	180

4.2.2	Experimental systems .....	180
(a)	In-vivo studies .....	180
(b)	In-vitro studies .....	186
4.3	Reproductive and developmental effects .....	190
4.3.1	Humans .....	190
4.3.2	Experimental systems .....	191
(a)	<i>Pan masala</i> .....	191
(b)	Areca nut .....	192
(c)	Arecoline .....	192
(d)	Stems of <i>Piper betle</i> .....	193
(e)	Nicotine .....	193
4.4	Genetic and related effects .....	194
4.4.1	Humans .....	194
(a)	Genotoxicity and mutagenicity .....	194
(b)	Genomic instability .....	196
(c)	Oncogenes and tumour-suppressor genes .....	196
(d)	Polymorphism in carcinogen-metabolizing enzymes .....	203
4.4.2	Experimental systems .....	213
(a)	Genotoxicity and mutagenicity .....	213
(b)	Oncogenes and tumour-suppressor genes .....	226
(c)	Polymorphisms in carcinogen metabolizing genes .....	227
(d)	Markers of tumour promotion .....	227
(e)	Preventive effects.....	227
4.5	Mechanistic considerations .....	228
5.	Summary of Data Reported and Evaluation.....	230
5.1	Exposure data .....	230
5.2	Human carcinogenicity data .....	231
5.3	Animal carcinogenicity data .....	232
5.4	Other relevant data .....	235
5.5	Evaluation .....	238
6.	References.....	239
<b>Some Areca-nut-derived N-Nitrosamines</b>	.....	279
1.	Exposure Data.....	281
1.1	Chemical and physical data .....	281
1.1.1	Synonyms and structural and molecular formulae .....	281
1.1.2	Chemical and physical properties.....	282
1.2	Production .....	282
1.3	Occurrence .....	283
1.4	Analysis.....	284
2.	Studies of Cancer in Humans .....	284

3.	Studies of Cancer in Experimental Animals.....	284
3.1	3-Methylnitrosaminopropionaldehyde .....	284
3.2	3-Methylnitrosaminopropionitrile .....	284
3.2.1	Oral application.....	284
3.2.2	Subcutaneous administration .....	285
3.2.3	Administration with known carcinogens or modifiers of cancer risk.....	285
3.3	<i>N</i> -Nitrosoguvacoline .....	286
3.3.1	Oral administration .....	286
3.3.2	Administration with known carcinogens or modifiers of cancer risk.....	286
4.	Other Data Relevant to an Evaluation of Carcinogenicity and its Mechanisms .....	287
4.1	Absorption, distribution, metabolism and excretion.....	287
4.1.1	Humans .....	287
4.1.2	Experimental systems .....	287
4.2	Toxic effects .....	287
4.2.1	Humans .....	287
4.2.2	Experimental systems .....	287
4.3	Reproductive and developmental effects .....	288
4.4	Genetic and related effects .....	288
4.4.1	Humans .....	288
4.4.2	Experimental systems .....	288
5.	Summary of Data Reported and Evaluation.....	291
5.1	Exposure data .....	291
5.2	Human carcinogenicity data .....	291
5.3	Animal carcinogenicity data .....	291
5.4	Other relevant data .....	292
5.5	Evaluation .....	292
6.	References.....	293
	GLOSSARY A .....	295
	GLOSSARY B .....	297
	CUMULATIVE INDEX TO THE <i>MONOGRAPHS</i> SERIES.....	301

## **NOTE TO THE READER**

The term ‘carcinogenic risk’ in the *IARC Monographs* series is taken to mean the probability that exposure to an agent will lead to cancer in humans.

Inclusion of an agent in the *Monographs* does not imply that it is a carcinogen, only that the published data have been examined. Equally, the fact that an agent has not yet been evaluated in a monograph does not mean that it is not carcinogenic.

The evaluations of carcinogenic risk are made by international working groups of independent scientists and are qualitative in nature. No recommendation is given for regulation or legislation.

Anyone who is aware of published data that may alter the evaluation of the carcinogenic risk of an agent to humans is encouraged to make this information available to the Unit of Carcinogen Identification and Evaluation, International Agency for Research on Cancer, 150 cours Albert Thomas, 69372 Lyon Cedex 08, France, in order that the agent may be considered for re-evaluation by a future Working Group.

Although every effort is made to prepare the monographs as accurately as possible, mistakes may occur. Readers are requested to communicate any errors to the Unit of Carcinogen Identification and Evaluation, so that corrections can be reported in future volumes.
