

Corrigenda to the *IARC Monographs* – Volume 100A

Monograph	Section	Table/Figure	Page	Details of Corrigendum
Preamble	A, 6	Text	5	<p>A sentence should be deleted from the Working Procedures, as follows:</p> <p>“... Subsequently, relevant biological and epidemiological data are collected by IARC from recognized sources of information on carcinogenesis, including data storage and retrieval systems such as PubMed. Meeting participants who are asked to prepare preliminary working papers for specific sections are expected to supplement the IARC literature searches with their own searches.</p> <p>For most chemicals and some complex mixtures, the major collection of data and the preparation of working papers for the sections on chemical and physical properties, on analysis, on production and use, and on occurrence are carried out under a separate contract funded by the US National Cancer Institute. Industrial associations, labour unions and other knowledgeable organizations may be asked to provide input to the sections on production and use, although this involvement is not required as a general rule. Information on production and trade is obtained from governmental, trade and market research publications and, in some cases, by direct contact with industries. ...”</p> <p>---</p> <p>This change was made to reflect the fact that when the United States National Cancer Institute (NCI) contract ended in 2006, the NCI provided supplemental funds to the IARC to continue the work that had been covered by their contractor. The contract between IARC and the contractor provided funds for pre-meeting assistance for three <i>IARC Monographs</i> meetings, Volumes 100A, C, and F.</p>
