List of abbreviations viii
Foreword ix

1 Introduction to the WHO Reporting System for Pancreaticobiliary Cytopathology 1
   Background 2
   The role of pancreaticobiliary cytopathology 4
   Integration of clinical, radiological, and key FNAB cytopathological features with ancillary testing in a diagnostic approach 5
   Diagnostic categories and report structure 6
   Risk of malignancy and management recommendations 9

2 Pancreaticobiliary cytopathology techniques 11
   Sampling methods and tissue triage
   FNAB techniques and specimen management for solid pancreatic masses 12
   FNAB techniques and specimen management for pancreatic cysts 13
   FNAB techniques and specimen management for bile duct brushings 14
   Percutaneous FNAB and specimen management 16
   Rapid onsite evaluation 17
   Ancillary testing
   Introduction: The role of ancillary testing 18
   Immunocytochemistry 19
   In situ hybridization 23
   Molecular testing 26
   Biochemical testing of cyst fluid 29

3 Diagnostic category: Insufficient/Inadequate/Non-diagnostic 31
   Introduction 32
   Definition 32
   Discussion and background 33
   Risk of malignancy and management recommendations 35
   Sample reports 36

4 Diagnostic category: Benign / Negative for malignancy 37
   Introduction 38
   Definition 38
   Discussion and background 39
   Risk of malignancy and management recommendations 40
   Benign non-neoplastic processes
   Normal pancreatic and biliary parenchyma and contaminants 41
   Acute pancreatitis 44
   Cholangitis 46
   Chronic pancreatitis 48
   Groove/paraduodenal pancreatitis 50
   Autoimmune and IgG4-related pancreatitis 52
   Lymphoepithelial cyst 55
   Pseudocysts 57
   Splenule (accessory spleen) 59
   Benign neoplastic processes
   Serous cystadenoma 61
   Schwannoma 64
   Lymphangioma 65
   Other rare benign neoplasms 66
   Sample reports 67

5 Diagnostic category: Atypical 71
   Introduction 72
   Definition 72
   Discussion and background 73
   Risk of malignancy and management recommendations 75
   Sample reports 76

6 Diagnostic category: Pancreaticobiliary neoplasm, low-risk/grade 77
   Introduction 78
   Definition 78
   Discussion and background 79
   Risk of malignancy and management recommendations 80
   Specific lesions
   Pancreatic intraepithelial neoplasia, low-grade 81
   Biliary intraepithelial neoplasia, low-grade 83
   Pancreatic intraductal papillary mucinous neoplasm, low-grade 85
   Intraductal papillary neoplasm of the bile duct, low-grade 87
   Mucinous cystic neoplasm, low-grade 88
   Other lesions (including spindle cell tumours) 90
   Sample reports 91

7 Diagnostic category: Pancreaticobiliary neoplasm, high-risk/grade 93
   Introduction 94
   Definition 94
   Discussion and background 95
   Risk of malignancy and management recommendations 96
   Specific lesions
   Pancreatic intraepithelial neoplasia, high-grade 97
   Biliary intraepithelial neoplasia, high-grade 99
   Pancreatic intraductal papillary mucinous neoplasm, high-grade 101
   Intraductal papillary neoplasm of the bile duct, high-grade 104
   Mucinous cystic neoplasm, high-grade 106
   Intraductal oncocytic papillary neoplasm 108
   Intraductal tubulopapillary neoplasm 110
   Sample reports 112

8 Diagnostic category: Suspicious for malignancy 115
   Introduction 116
   Definition 116
   Discussion and background 117
   Risk of malignancy and management recommendations 119
   Sample reports 120

9 Diagnostic category: Malignant 121
   Introduction 122
   Definition 122
   Discussion and background 123
   Risk of malignancy and management recommendations 124
