

Corrigenda to the IARC Monographs – Volume 99: Some Aromatic Amines, Organic Dyes, and Related Exposures

Monograph	Section	Table/Figure	Page	Details of Corrigendum	Monograph first posted online	Correction made to PDF online?	Correction made in printed version?
Auramine and auramine production	6.3	Text	134	The sentence “Michler’s base is <i>possibly carcinogenic to humans</i> (Group 2B).” is missing from the Overall evaluation.	-	No	No
Preamble	A, 6	Text	5	<p>A sentence should be deleted from the Working Procedures, as follows:</p> <p>“... Subsequently, relevant biological and epidemiological data are collected by IARC from recognized sources of information on carcinogenesis, including data storage and retrieval systems such as PubMed. Meeting participants who are asked to prepare preliminary working papers for specific sections are expected to supplement the IARC literature searches with their own searches.</p> <p>For most chemicals and some complex mixtures, the major collection of data and the preparation of working papers for the sections on chemical and physical properties, on analysis, on production and use, and on occurrence are carried out under a separate contract funded by the US National Cancer Institute.</p> <p>Industrial associations, labour unions and other knowledgeable organizations may be asked to provide input to the sections on production and use, although this involvement is not required as a general rule. Information on production and trade is obtained from governmental, trade and market research publications and, in some cases, by direct contact with industries. ...”</p>	-	No	No
